Tasks in this workbook

Pri nalogah v tej zbirki otrok kopira vzorec, ki ga ima na predlogi.

Vzorce sestavlja osem paličic.

Paličice so obarvane s štirimi barvami: modro, rdečo, rumeno in zeleno.

Zahtevnost vzorcev se skozi Volume postopoma stopnjuje od preprostih do bolj kompleksnih.

Navodilo

Dobro si oglej vzorec in sestavi (ali nariši) enakega.

Primera:

Preprost vzorec

Kompleksen vzorec

About copying patterns

Zakaj so dejavnosti kopiranja vzorcev pomembne

Kopiranje vzorcev spodbuja otrokov kognitivni razvoj.

Naloge, ki otroke izzovejo k kopiranju predloženih vzorcev spodbujajo njihove opazovalne sposobnosti in drobno motoriko rok ter prstov. Ko otroci primerjejo svoj nastajajoči vzorec s predlogo, se utrjuje njihova pozornost ter zmožnosti koncentracije, primerjanja in prepoznavanja podobnosti ter razlik.

Naloge v tej zbirki otroke spodbujajo k natančnemu opazovanju predlog, kar lahko prispeva k izboljšanju njihove sposobnosti osredotočanja na podrobnosti. Naloge, ki vključujejo več različnih vidikov, na katere so biti pozorni pri izbiranju ustreznih elementov za nastajajoče vzorce (barva, oblika, položaj, orientacija posameznih elementov), od otrok zahtevajo več koncentracije in zbranosti. Zato z njimi otroci izboljšajo sposobnosti vidnega razločevanja, ki so ključne za prihodnje pomembne razvojne izzive, kot so učenje branja, pisanja in računanja. Kopiranje vzorcev spodbuja razvoj miselne prožnosti, prilagodljivosti in kritičnega mišljenja ter sposobnosti reševanja problemov, saj morajo otroci za uspešno rešitev naloge analizirati in oceniti vsak element predloženega vzorca. Ker te naloge od otroka zahtevajo priklic podrobnosti predloge in primerjanje teh z njihovim nastajajočim vzorcem, pomagajo tudi krepiti vidni in kratkoročni spomin.

Še en pomemben vidik nalog pri katerih otroci kopirajo vzorce je spodbujanje potrpežljivosti in vztrajnosti, ki sta nujno potrebni življenjski veščini tako za reševanje tovrstnih nalog kot tudi doseganja ciljev pri različnih drugih izzivih, s katerimi se bodo otroci soočali pozneje.

Activity aids - sticks

Naloge iz tega zvezka lahko izvajate na več načinov:

- različica 1 - otrokom predložite vzorec, oni pa nanj položijo enake paličice kot ga sestavljajo,
- različica 2 - otroci iz paličic, ki jih imajo na razpolago, sestavijo enak vzorec, ki je enak predlogi,
- različica 3 - otroci na list papirja narišajo vzorec, ki je enak predlogi.

Na straneh od 6 do 11 so natisnjene barvne paličice, s katerimi si lahko pomagate pri izvajanju aktivnosti iz tega zvezka. Glede na raven drobno-motoričnih spremnosti posameznih otrok (mlaši otroci lažje rukujejo z večjimi predmeti, manjše paličice pa so bolj primerne za otroke, ki jim gre drobna motorika prstov že bolje od rok) in prostor, ki ga imate na razpolago, lahko izberete manjše (dolžina 75 mm), srednje (dolžina 120 mm) ali večje paličice (dolžina 170 mm).

Natisnite in plastificirajte poljubno število kopij listov z barvnimi paličicami, potem pa izrežite in shranite paličice, ki jih bodo otroci uporabljali pri reševanju nalog iz tega zvezka.

About Brainscribed program

EXTENSIVE collection of activities

Brainscribed collection features thousands of worksheets with tens of thousands of challenges and activities of different types, created to stimulate the development of visual-motor integration and graphomotor skills in children. With its extensive corpus of materials, it is one of the most comprehensive collections of its kind, **globally**.

Based on BRAIN & EDUCATIONAL SCIENCE

Science fact:
Visual-motor exercises create functional connections among visual and motor regions in brains.

Science fact:
Fine motor skills, non-verbal intelligence and executive functioning are significantly interrelated.

Science fact:
Visual-motor exercises improve graphomotor skills which are important predictors of later academic achievement.

FUN and CHALLENGING activities

Brainscribed resources stimulate visual-motor integration development with countless fun and **developmentally appropriate** activities, designed to be **user friendly** both for adults working with children (easy selection of developmentally appropriate activities according to the child's current stage of visual-motor integration and skills), as well as for children (challenging activities).

Designed for EXPERTS and PARENTS

Brainscribed workbooks provide **teachers** and other **experts** (preschool, school, special education, therapy, etc.) with appropriate and gradually challenging tasks according to developmental needs of their children as well as offer **parents** developmentally appropriate and gradually challenging tasks for their children.

Activities for EVERY child ...

... and for children with DIFFICULTIES

Every child's visual motor integration and skills development can **benefit** from graphomotor / visual-motor tasks and training at home or in a classroom.

Visual-motor deficits and graphomotor difficulties can be debilitating for children. Teachers and other experts working with children with visual motor integration problems or/and with writing problems will find a plentitude of useful and engaging tasks for a **systematic intervention** in Brainscribed workbooks for children with visual-motor difficulties.

Created by EXPERTS

Dr. Kristijan Musek Lešnik (Ph.D.) - Founder and Chair of the Centre for Positive Psychology, University of Primorska, Slovenia - President of the Council of Experts for General Education of the Republic of Slovenia - past President of the Committee for the Children with Special Needs - past President of the National Testing Committee, Slovenia.

Dr. Petra Lešnik Musek (Ph.D. in Developmental Psychology) - Specialist of Clinical Psychology at the Department of Child Neurology, Paediatric Clinic of the University Clinical Centre, Ljubljana, Slovenia - combines years of experience in developmental psychology and family therapy in clinical work with children and their families.

Different types of Brainscribed tasks

Brainscribed activities are organised into thematic workbooks.

In each volume, the difficulty of the tasks gradually increases.

All Brainscribed activities are designed to stimulate visual-motor integration and the development of graphomotor and other fine-motor skills in a way that is interesting and engaging for children.
